

# MEASUREMENT TECHNOLOGY

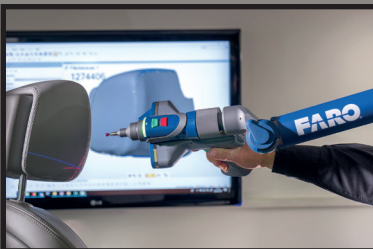

Since 2019, we have also **specialised** in the field of **measurement technology**.

This involves the **scanning** and **analysis** of data for developing vehicle interiors.

## FARO – SCANARM

- Performing scanning tasks with Poly Works
- Evaluation of scan data (variance analysis)
- Comparison of colour data to references
- Creation of section folders, e.g., of seam contours or surface deviations
- Creation of measurement reports
- Polygon model rendering in STL
